

I wish I had known about these KRYPTOK Glasses long ago.

This is the remark which is frequently made to us. KRYPTOK Glasses are such a wonderful convenience for near and far vision that everyone to whom we recommend them is enthusiastic over the ease and comfort they afford.

You to, will thank us for calling KRYPTOKS to your attention if you are one of the many persons who should wear double vision glasses.

They are solid lenses with smooth, clear surfaces that cannot be distinguished from single vision glasses.

We suggest that you call and let us explain the advantages of KRYPTOKS to you fully.

It was then that the marshal thought it time to interfere, whereupon the fellow with the knife made a lunge at the marshal, the knife grazing the left cheek, causing an abrasion of the skin but not cutting through.
